

The National Assessment of Educational Progress (NAEP) assesses reading in two contexts described in the NAEP framework: reading for literary experience and to gain information. The NAEP reading scale ranges from 0 to 500.

Overall Reading Results for Montana

- In 2003, the average scale score for fourth-grade students in Montana was 223. This was not found to be significantly different¹ from the average score in 2002 (224), and was not found to be significantly different from the average score in 1994 (222).
- Montana's average score (223) in 2003 was higher than that of the nation's public schools (216).
- Of the 53 states and jurisdictions² that participated in the 2003 fourth-grade assessment, students' average scale scores in Montana were higher than those in 26 jurisdictions, not significantly different from those in 22 jurisdictions, and lower than those in 4 jurisdictions.
- The percentage of students in Montana who performed at or above the NAEP *Proficient* level was 35 percent in 2003. This percentage was not found to be significantly different from 2002 (36 percent), and was not found to be significantly different from 1994 (35 percent).

Student Percentage at NAEP Achievement Levels

¹ Accommodations were not permitted for this assessment.

NOTE: The NAEP reading scale ranges from 0 to 500, with the achievement levels corresponding to the following points: *Below Basic*, 207 or lower; *Basic*, 208-237; *Proficient*, 238-267; *Advanced*, 268 or above.

Performance of NAEP Reporting Groups in Montana

Reporting groups	Percentage of students	Average Score	Percentage of students at			
			Below <i>Basic</i>	<i>Basic</i>	<i>Proficient</i>	<i>Advanced</i>
Male	51	218	35	35	24	6
Female	49	228	26	34	30	10
White	85	227	26	36	29	9
Black	1	---	---	---	---	---
Hispanic	2	---	---	---	---	---
Asian/Pacific Islander	1	---	---	---	---	---
American Indian/Alaska Native	11	195 ↓	62 ↑	23 ↓	13	2
Free/reduced-price school lunch						
Eligible	36	208	47	33	17	3
Not eligible	58	232	20	35	33	11

Average Score Gaps Between Selected Groups

- In 2003, male students in Montana had an average score that was lower than that of female students (10 points). This performance gap was not significantly different from that of 1994 (9 points).
- The sample size was not sufficient to permit a reliable estimate for Black students in Montana.
- The sample size was not sufficient to permit a reliable estimate for Hispanic students in Montana.
- In 2003, students who were not eligible for free/reduced-price school lunch had an average score that was higher than that of students who were eligible (24 points). This performance gap was not significantly different from that of 1998 (21 points).

Reading Scale Scores at Selected Percentiles

An examination of scores at different percentiles on the 0–500 NAEP reading scale at each grade indicates how well students at lower, middle, and higher levels of the distribution performed.

The estimate rounds to zero.

--- Reporting standards not met; sample size insufficient to permit a reliable estimate.

* Significantly different from 2003.

↑ Significantly higher than, ↓ lower than 2002.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples and changes in sample sizes. NAEP sample sizes have increased since 2002 compared to previous years, resulting in smaller detectable differences than in previous assessments.

² "Jurisdictions" includes participating states and other jurisdictions (such as the District of Columbia and the Department of Defense Dependents Schools). NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for Free/reduced-price lunch is not displayed. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
